

GuidelyEdu-UX-EXPERIENCE

GuidelyEdu — Experience Spine

Product IA and behaviour from the PRD. Visual tokens from DESIGN.md (wireframe style).
Spines win over any wireframe screen layout that contradicts the PRD.

Foundation

Form-factor: Multi-surface — **Web Client** (complete for all Roles) + **Hybrid Client** (same Vue SPA; Teacher/Support Staff capture and SENCO review first). [ASSUMPTION: Capacitor shell per addendum.]

UI system: Vue 3 SPA + Tailwind tokens mapped to DESIGN.md. No separate native UI kit.

Product: Complementary SEND interpretation/documentation layer beside MIS. Deterministic SRE; never diagnostic/generative AI surfaces.

Tenancy: School or Trust Tenant; feature flags hide Trust/advanced surfaces without removing them from the build (PRD FR-4).

Information Architecture

Authenticated shell (from wireframe chrome, **nav labels from PRD**):

Surface	Primary Roles	Purpose	PRD
Sign in	All	Credentials (SSO when configured)	FR-8, FR-9
Role home (Dashboard)	Per Role	KPI + due work + shortcuts	—
My Pupils / cohort	Teacher, Support Staff, SENCO	Assigned/School Pupil list	FR-11–13
Capture Observation	Teacher, Support Staff	Structured Observation	FR-14
Capture Intervention	Teacher, Support Staff, SENCO	Provision-linked Intervention	FR-15
Capture Pupil Response	Teacher, Support Staff, SENCO	Response linked to Intervention/context	FR-16
Drafts	Author + School SENCO	Unsubmitted drafts	FR-18
Pupil Evidence Base	Scoped Roles	Chronological Evidence Records + status	FR-20–22
Determinations & Gaps	SENCO (+ School Leader read)	Four dimensions, Gap list, status	FR-26–37
Reasoning Pathway	SENCO (+ permitted)	Rule, evidence, pathway	FR-32
Override	SENCO, School Leader	Proceed with rationale	FR-34
Review Cycles	SENCO	Create, due list, close; automation when flagged	FR-42–44
Documentation Outputs	SENCO	Review summary, EHCP pack, tribunal/inspection when flagged	FR-38–41, FR-33
School Report	SENCO, School Leader	Documentation readiness counts	FR-45–46
Import Template	SENCO, Tenant Admin	Upload Pupils/evidence	FR-47
Connectors	Tenant Admin / operator	Field sharing, sync	FR-48–50
Trust Dashboard	Trust SEND Lead, Trust Executive	Multi-School Indicators, escalations, trends	FR-51–53
Users & Roles	Tenant Admin	Provision, deactivate	FR-5, FR-54
Pilot toolkit	Operator / Tenant Admin	Checklist, templates, metrics export	FR-55
Ontology / Rule publish	Platform operator	Version publish	FR-56, FR-60

Surface	Primary Roles	Purpose	PRD
Compliance risk alerts	SENCO / Trust (when flagged)	Indicator-threshold alerts	FR-59
Safeguarding signal (context)	SENCO, School Leader (when flagged)	Minimised signal display — not casework	FR-58

Out of IA (explicit): Parent portal, student LMS, clinician EMR, Local Authority ops, marketing site, lesson planning, attendance/budget MIS.

Sidebar by Role [ASSUMPTION: exact order]:

- **Teacher / Support Staff:** Dashboard · My Pupils · Capture · Drafts · Messages(none in PRD — omit) · Settings
- **SENCO:** Dashboard · Pupils · Review Cycles · Gaps · Outputs · School Report · Import · Settings
- **School Leader:** Dashboard · School Report · Review Cycles (read) · Settings
- **Trust SEND Lead:** Trust Dashboard · Schools · Alerts · Settings
- **Tenant Admin:** Users · Schools · Connectors · Feature flags · Pilot toolkit · Settings

Top bar search: Pupils and Review Cycles by name/id within scope — not free-text across Trust for Teachers.

→ Composition reference: [mockups/teacher-capture.html](#), [mockups/senco-evidence-base.html](#), [mockups/school-report.html](#). Spine wins on conflict.

Mock coverage: those three surfaces are mocked; all other IA rows are spine-only for the PO pack.

Voice and Tone

Microcopy. Brand posture in DESIGN.md.

Do	Don't
"Documentation status: Gaps — 2 open"	"AI found risks in this child"
"Determination: evidential sufficiency — not met"	"Diagnosis incomplete" / confidence %
"This output supports professional judgement; it is not a statutory decision."	"Auto-approved for EHCP"
"Draft — not yet on the Evidence Base"	Silent offline save that looks live
"No applicable Rule for this dimension (coverage)"	Green "healthy" with no Rule
UK Glossary: SENCO, EHCP, Graduated Response	IEP, SENDCO, client/patient

Always show the FR-35 disclaimer near Determinations and Documentation Outputs.

Component Patterns

Behavioral; visuals in DESIGN.md.

Pattern	Behaviour
KPI row	3–4 cards; number is live count; click drills to filtered list
Pupil row	Name, year, documentation status pill, next Review Cycle date; opens Evidence Base
Capture form	Required Ontology-bound fields; validate on submit; success returns to Evidence Base with new row highlighted
Status pill	Enumerated: ready · gaps · uncovered · not-started (locked 2026-08-20)
Gap list	Each Gap links to Reasoning Pathway; closed only by meeting Rule or Override
Reasoning Pathway	Expandable: Rule id/name/version → conditions → Evidence Record links → Determination
Confirm output dialog	Checkbox + named User; blocked without confirmation (FR-33)
Override dialog	Mandatory rationale (≥20 chars); keeps Determination history
Import results	Partial success table: committed vs row errors
Feature-flagged empty	“Not available for this Tenant” — never empty chart implying zero risk

State Patterns

State	Treatment
Loading	Skeleton cards matching layout (wireframe density)
Empty Pupils	"No Pupils in your list." SENCO: CTA Import Template / add Pupil
Empty Evidence Base	"No Evidence Records yet." Teacher: Capture CTA
Uncovered Rule dimension	Label Uncovered , not success
Offline Hybrid draft	Banner: "Saved on this device — not on the Evidence Base until you reconnect"
Sync conflict	Server wins Pupil identity; draft retained for author
Permission denied	Hide nav item; deep link → "You don't have access"
SRE running	Inline spinner on Pupil status; no blocking full-page unless >3s
Flag off	Not-available page with Tenant Admin contact hint
Danger actions (export all / deactivate last admin)	Confirm dialog; never one-click

Interaction Primitives

- **Primary:** pointer/touch. Keyboard: visible focus {colors.focus-ring}; Tab order = reading order.
- **Hybrid:** large tap targets on Capture (≥44px); bottom sheet for Pupil picker [ASSUMPTION].
- **Banned:** hover-only actions on mobile; generative "recommend intervention" panels; confidence meters; diagnostic language.
- **Modals:** one level deep (confirm / override / pathway detail).

Accessibility Floor

- WCAG 2.2 AA (PRD NFR-4).
- Status never colour-only — pill text + icon.
- Screen reader: announce surface on navigate ("Evidence Base, {Pupil name}").
- Reasoning Pathway fully readable without colour; headings hierarchy h1→h3.
- Forms: associated labels; errors linked with aria-describedby.
- Reduced motion: respect prefers-reduced-motion for skeletons only (no decorative motion required).

Responsive & Platform

Surface priority on Hybrid	Why
Capture + My Pupils + Drafts	UJ-1 classroom
Evidence Base + Gaps (SENCO)	UJ-2 on tablet
School Report / Trust / Admin	Web-primary; usable but dense on phone

Europe/London dates; English (UK).

Inspiration & Anti-patterns

- **Lifted from wireframes:** purple top bar, sidebar, white KPI cards, soft shadows, outline icons, status pills, full-width card CTAs.
- **Rejected from wireframes:** parent assessments, student LMS, clinician caseload, LA dashboard as core nav, IEP management naming, EduConnect branding, generative AI recommendation grids.
- **Rejected elsewhere:** dark-mode-first EdTech; purple-on-white marketing gradients inside operational views; “confidence score” UX.

Key Flows

Mirror PRD UJ-1...UJ-5. Persona names and climax beats preserved.

Flow 1 — UJ-1 James logs Intervention (Teacher, Hybrid or Web)

1. James signs in → Teacher Dashboard.
2. Opens **My Pupils** → selects Pupil.
3. **Capture Intervention** — Provision term required, session context, notes.
4. Submits → SRE re-evaluates → documentation status may update.
5. **Climax:** Evidence Base shows the new Intervention in time order; he does not keep a spreadsheet copy.
6. Failure: offline → draft banner; reconnect submits; Audit Event notes client type.

Flow 2 — UJ-2 Aisha prepares Annual Review (SENCO, Web)

1. SENCO Dashboard → **Review Cycles** due list → opens Pupil.
2. Reads **Gaps** and four **Determinations**; opens **Reasoning Pathway** on a failing Rule.
3. Requests missing capture or adds review note; or **Override** with rationale.
4. **Generate** review summary / EHCP pack → confirmation dialog (FR-33).

5. **Climax:** Downloadable Documentation Output cites Evidence Record and Determination ids; disclaimer visible.
6. Failure: generation without confirm blocked; toast explains.

Flow 3 — UJ-3 Priya inspection-readiness (School Leader, Web)

1. Sign in → School Leader Dashboard / **School Report**.
2. Sees counts by documentation status, open Gaps, Review Cycles due — no attendance/budget.
3. **Climax:** Knows whether the School is review-ready this month; drills to list, does not edit Evidence Records.
4. Failure: empty Tenant → “No Pilot data yet.”

Flow 4 — UJ-4 Import before Connector (SENCO / Admin)

1. Connectors not authorised → **Import Template** download.
2. Upload → row errors + partial commit.
3. Teachers see Pupils same day.
4. **Climax:** Capture works without MIS; later Connector upserts by MIS key without duplicates.
5. Failure: all rows invalid → nothing committed; clear error file.

Flow 5 — UJ-5 Daniel Trust oversight (Trust SEND Lead)

1. Trust Dashboard enabled → Indicators across Schools.
2. Escalation flag cites Rule; drill to School Report — not raw Pupil narratives by default.
3. **Climax:** Outlier School identified for support before board/inspection surprise.
4. Failure: flag off → not-available, not a zeroed “perfect” chart.

Open Questions (UX)

1. Supply SVG / licensed logo to replace interim script wordmark.
2. Whether additional HTML mocks are needed before build (Trust Dashboard, Import results, Override dialog) — currently spine-only.

Locked decisions (finalize 2026-08-20)

- Status pills: ready | gaps | uncovered | not-started
- Emerald secondary CTA retained; primary purple for primary actions
- Hybrid Teacher: bottom nav (Home, Pupils, Capture, Drafts, More)
- School Leader: School Report primary; Reasoning Pathway read-only on drill-down
- Validation lenses skipped on finalize
- Key mocks: teacher-capture, senco-evidence-base, school-report; remaining IA spine-only

Assumptions Index

- Vue 3 + Tailwind; Capacitor hybrid.
- Light mode only v1.
- Wireframe shell kept; wireframe product IA discarded.
- Sidebar order by Role as tabled.
- Search scoped to Role.
- No in-app messaging (not in PRD).
- Brand script temporary until SVG.
- Emerald secondary retained for secondary CTA only.
